Innovative model of
financing, business and
investment category

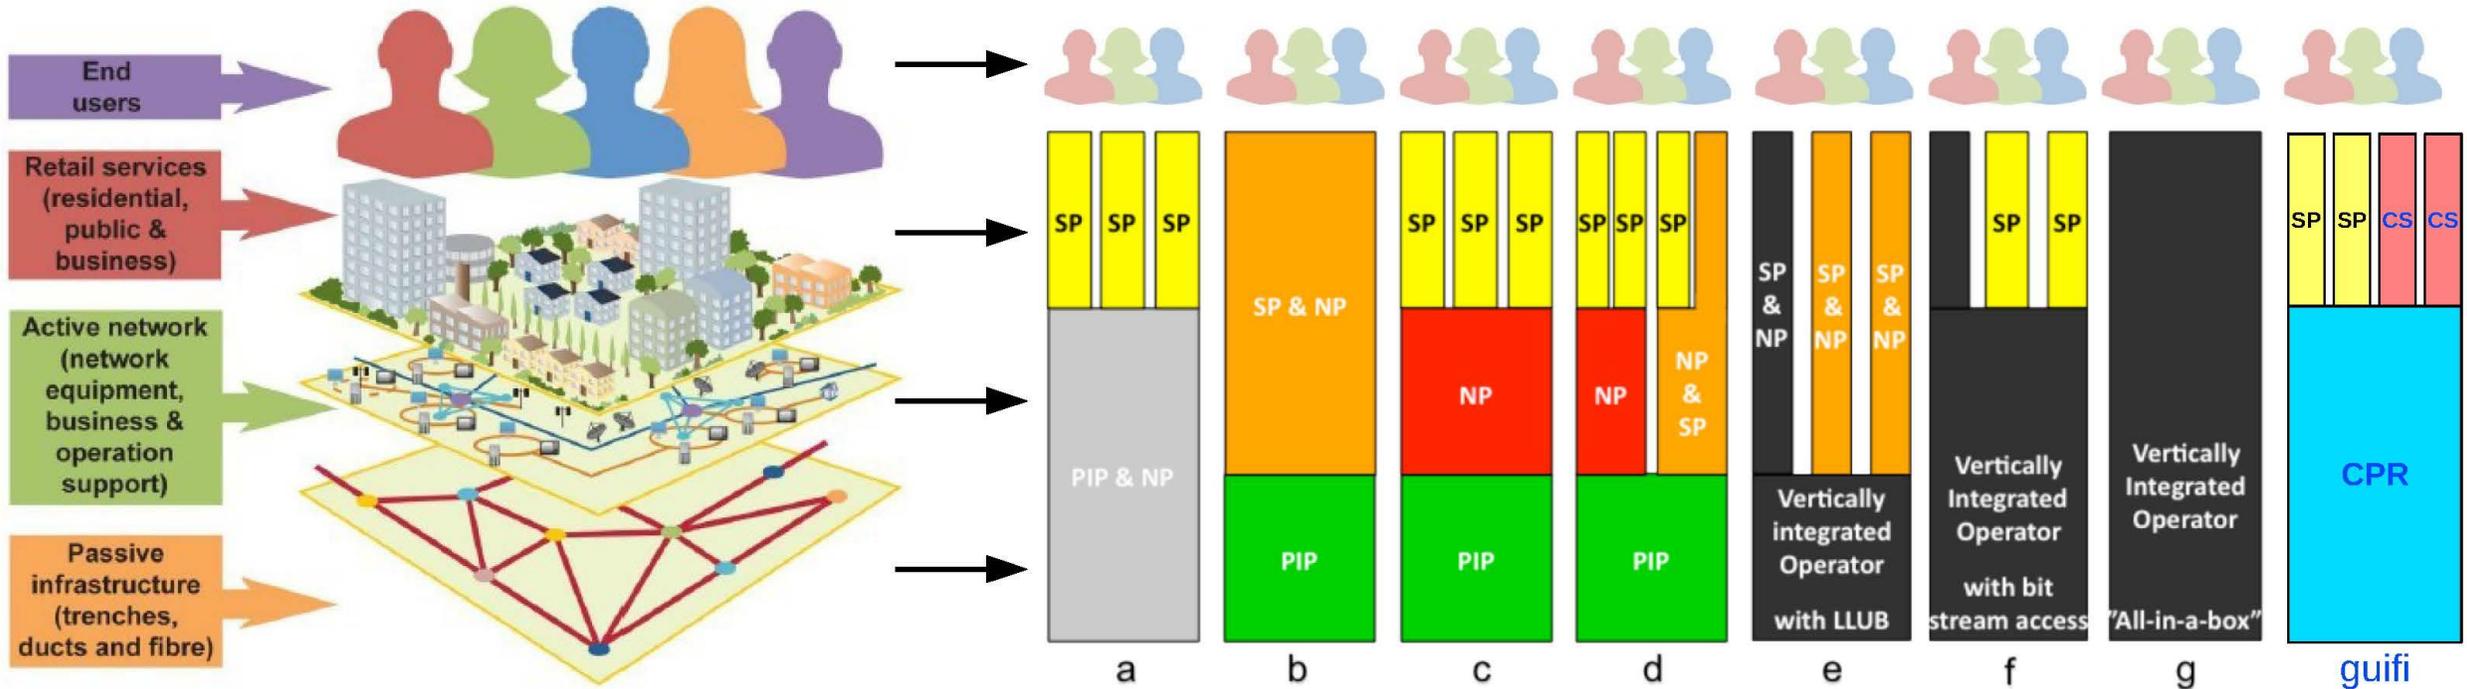

- Introduction
 - Community Networks
 - Problem statement
 - Guifi.net response
- Theoretical framework
- guifi.net experience
- Collaboration opportunities

- Community Networks (CNs)
 - Community networks are networks built by citizens and organisations who pool their resources and coordinate their efforts to build network infrastructures
 - Traits: open, free, neutral
 - Examples: FreiFunk (Germany), FunkFeuer (Austria), wlan Slovenia, etc.
- Problem / challenge
 - Frequently based on voluntary efforts and non-refundable contributions
 - How to make them **sustainable** and **scalable**?
- Guifi.net response
 - Network **as a commons**
 - Enable a **multistakeholder ecosystem**
 - Enable **professional activity**
 - Ensure **reinvestment** of a fraction of the benefits of this professional activity
 - Ensure **diversity** in participation
 - Etc.

- Introduction
- Theoretical framework
 - Bringing the **commons** to the telecoms sector
- guifi.net experience
- Collaboration opportunities

Access network layers

Supply chain models

(Alcatel-Lucent)

PIP – Physical Infrastructure Provider
 NP – Network Provider
 SP – Service Provider
 LLUB – Local Loop Unbundling

CPR – Common Pool Resource
 CS – Community service

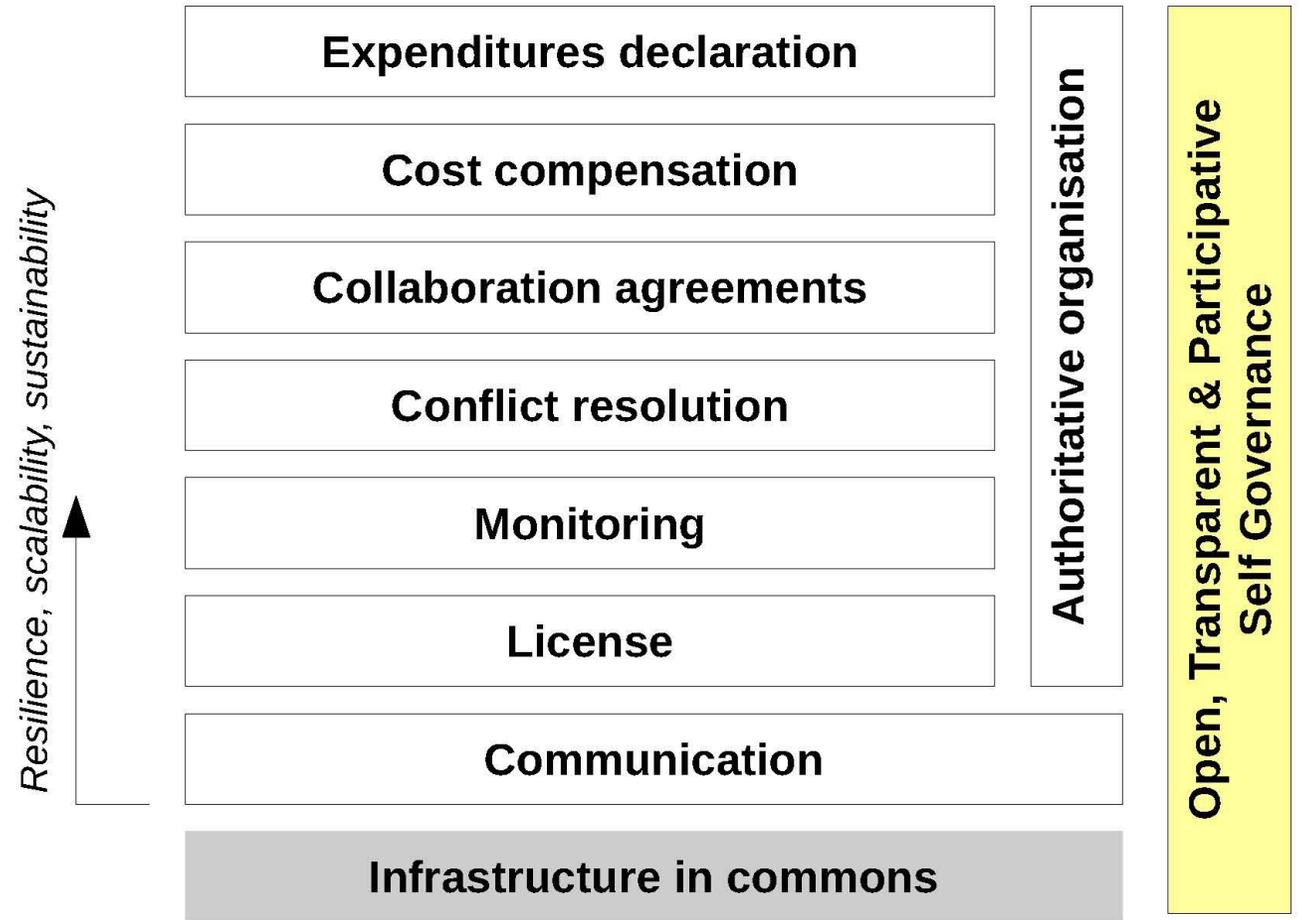

(Forzati 2010)

- Increases the efficiency (*better performance or wider coverage for the same investment*)
 - Stimulates cooperation
 - Prevents duplication of infrastructure/efforts
 - Facilitates economies of scale
- Maximises freedom choice
 - Coexistence of DIY and professional options
 - Equalises business opportunities
 - Lowers entry barriers
 - Expands the market
- Professional activity
 - Involves dependency on the infrastructure (to meet SLAs with customers)
 - Reinvestment needed
- Well aligned with CNs principles

- CPR \implies **Depletion (& others)**
 - Well-known problems in other fields
 - E. Ostrom works, etc.

- Introduction
- Theoretical framework
- **guifi.net experience**
- Collaboration opportunities

- Sustainability by design
- Based on the commons collaborative economy
 - E. Ostrom (2009 Nobel Prize in Economics) principles
- Based on supply-demand pricing, but
 - Non-speculative
 - Fair trade
 - Prevent externalities
- A win-win ecosystem
 - Rises funding
 - Enables economies of scale
- Accountable
- Implemented through
 - Written consensus rules (license)
 - Signed agreements

A Collaborative Economy with ...

Expenses & Contributions (e.g.: = 100€)

Resource Usage (%)

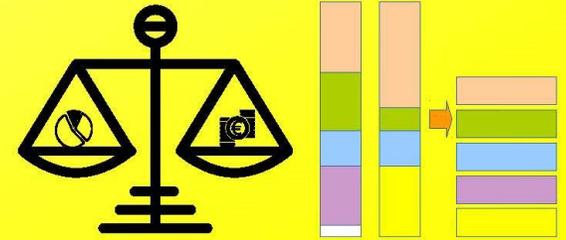

Compensation settlement To **Compensate** or to **Pay**

$\Sigma = 0$

Compensation tables

- Establish the territorial compensation criteria
- Monthly periodicity

Operadors/ Service providers @

Rights

- Voice and vote
- To receive compensations
- To make proposals

Duties

- To settle the compensations
- To provide the data to calculate the compensations

Public Admin. or Investors

(optional)

Rights

- Voice and vote
- Quality vote & veto on issues related to benefits or administration of public resources

- To Make proposals

Duties

- To stick to criteria of
- non-discrimination & equality

Fundació *guifi.net*

Rights

- Voice
- Quality vote & veto on issues related to the Commons

Duties

- To make proposals targeting the consensus
- Accounting
- Execute the compensations

Invoice

March 2016

Contribution to the Network as in Commons (Commons Pool Resource/CPR):

Deployment of Infrastructure.....	17,00 €
Maintenance.....	6,00 €
Total Contribution.....	23,00 €

Internet Service:

1 Gigabit Symmetric Internet Bandwidth over Fibre Optics	
Residential Use & Service Level (8h+8h, 8h/labour days).....	12,00 €
Tax (VAT)	2,52 €

TOTAL: 37,52 €

Commons Pool
Resource (CPR)

- Acknowledgement of the investment
- Deployment of the network as a commons
- Connection of users
- Billing
- Bill split (parts):
 - Exploitation by the service provider
 - Infrastructure maintenance
 - Return of investment

- Introduction
- Theoretical framework
- guifi.net experience
- **Collaboration opportunities**

- What you have
 - Leadership
 - Reference point for the citizenship
 - Capacity building
 - Centre of knowledge
 - Experience in training
 - Social network
 - Public authorities
 - International relationships
 - Facilities
 - Internet connection
 - Electricity
 - Security

- What you can do
 - Leadership
 - Lead the initiative – *be the seed*
 - Capacity building
 - Training materials
 - Workshops
 - Social network
 - Public authorities – *make the contacts, support the initiatives*
 - International relationships – *international coordination, mutual support*
 - Facilities
 - Electricity, Security – *Initial location*
 - Internet connection – *initial uplink*

- Potential partnerships
 - Internet Society (ISOC)
 - e.g. Beyond the net initiative
 - Institute of Electrical and Electronics Engineers (IEEE)
 - Connectivity coalition
 - Internet Research Task Force (IRTF)
 - GAIA WG
 - Internet Governance Forum (IGF)
 - Dynamic Coalition on Community Connectivity
 - Existing communities
